CONTENTS

Simulation of flow between concentric rotating spheres. Part 1. Steady states. PHILIP S. MARCUS and LAURETTE S. TUCKERMAN *page* 1

Simulation of flow between concentric rotating spheres. Part 2. Transitions. PHILIP S. MARCUS and LAURETTE S. TUCKERMAN 31

Swirling recirculating flow in a liquid-metal column generated by a rotating magnetic field. P. A. DAVIDSON and J. C. R. HUNT 67

Topographic waves in rectangular basins. THOMAS STOCKER and KOLUMBAN HUTTER 107

On the genesis of quasi-steady vortices in a rotating turbulent flow. MATHIEU MORY and PHILIPPE CAPERAN 121

Experimental studies of wakes behind circularly capped bubbles. W. F. BESSLER and H. LITTMAN 137

Uniformly valid analytical solution to the problem of a decaying shock wave. V. D. SHARMA, RISHI RAM and P. L. SACHDEV 153

The compressible vortex pair. D. W. MOORE and D. I. PULLIN 171

Heat transport by parallel-roll convection in a rectangular container. R. W. WALDEN, PAUL KOLODNER, A. PASSNER and C. M. SURKO 205

Instability and breaking of a solitary wave. M. TANAKA, J. W. DOLD, M. LEWY and D. H. PEREGRINE 235

Reflection of water waves in a channel with corrugated bed. T. BROOKE BENJAMIN, B. BOCZAR-KARAKIEWICZ and W. G. PRITCHARD 249

Ideal jet flow in two dimensions. FRÉDÉRIC DIAS, ALAN R. ELCRAT and LLOYD N. TREFETHEN 275

Bubble dynamics in a compressible liquid. Part 2. Second-order theory. A. LEZZI and A. PROSPERETTI 289

Stability of rigid motions and coating films in bicomponent flows of immiscible liquids. DANIEL D. JOSEPH and LUIGI PREZIOSI 323

Throughflow effects in the Raleigh–Bénard convective instability problem. D. A. NIELD 353

Influence of viscosity on the capillary instability of a stretching jet. I. FRANKEL and D. WEIHS 361

Wave splitting in a fluid of large heat capacity. PHILIP A. THOMPSON, HUMBERTO CHAVES, G. E. A. MEIER, YOON-GON KIM and H.-D. SPECKMANN 385

Sediment transport during unsteady settling in an inclined channel. GUSTAV AMBERG and ANDERS A. DAHLKILD 415

Note on the direct calculation of mobility functions for two equal-sized spheres in Stokes flow. Byung Jun Yoon and Sangtae Kim 437

On the performance of particle tracking. Juan C. Agüí and J. Jiménez 447

Mean drift forces on arrays of bodies due to incident long waves. P. McIver 469

Turbulence in radial flow between parallel disks at medium and low Reynolds numbers. M. Tabatabai and A. Pollard 483

A model for the dynamics of polymers in laminar shear flows. D. E. Keyes and F. H. Abernathy 503

The run-up of solitary waves. Costas Emmanual Synolakis 523

On the Rallison and Acrivos solution for the deformation and burst of a viscous drop in an extensional flow. Henry Power 547

Dynamics of ideal fluid flows over an uneven bottom. Eugene S. Benilov 551

The boundary layer due to a three-dimensional vortex loop. S. Ersoy and J. D. A. Walker 569

Review

Nonlinear Dynamics and Chaos, by J. M. T. Thompson and H. B. Stewart 599
